

Michael Guirguis Rejoins LEE + RO as a Managing Engineer

Leading infrastructure planning, design, and rehabilitation Projects

CITY OF INDUSTRY, Calif., February 05, 2024 – LEE + RO, Inc., today announced that Michael Guirguis, P.E., has rejoined the company as a managing engineer. He will be working out of the City of Industry office.

Michael brings 20+ years of wet infrastructure and civil engineering experience in applying the best technologies to extend water systems' lifecycles to provide high levels of reliability while maintaining a relatively low operation and maintenance cost. He specializes in water, wastewater, reclaimed water facilities, and conveyance planning, design, condition assessment, rehabilitation, site civil design, and construction management.

Michael has successfully led numerous potable, wastewater, and recycled water pump station projects throughout the Western US. With his diverse civil engineering experience, he has designed and prepared accurate bid packages, resulting in successful construction with minimal change orders.

Charles Ro, LEE + RO president, said: "We're thrilled to have Michael back. He brings a unique combination of technical competence and leadership, and we look forward to leveraging his skillset to deliver for our clients and provide hands-on technical mentorship for our engineers and designers. Michael will strengthen our culture and expand our capabilities."

"Returning to LEE + RO at this time is a fantastic opportunity for me," said Michael. "Seeing the company's evolution and growth over the past 9 years is amazing. Being able to implement my skills to help the company reach its goals while being able to share my knowledge with the next generation of up-and-coming engineers is especially gratifying."

Before joining LEE + RO, Michael spent the previous 10 years at Brown and Caldwell as a Civil Design Lead Engineer. He led design teams on lift stations, force mains, upgrades, and rehabilitation of pumping plants. He also served as the technical lead during design and managing the preparation of the completed bid documents. Michael began his career as a project engineer with MWH (now part of Stantec).

Michael received his BS in civil engineering from California Polytechnic University at Pomona in 2001. He holds a California-registered license as a professional engineer (civil).
